

EMPAthy for your EU Project

Who is behind EMPA

EMPA is an Environmental & Marine Project Management Agency specialising in EU projects.

Since 1987 Dr. Johanna Wesnigk, EMPA's executive director, has been working in the areas of environmental, marine and maritime research as scientist, coordinator and project manager.

The idea for EMPA developed out of her successful work for the Max Planck Institute for Marine Microbiology in Bremen, Germany.

In 2005 she founded EMPA to be able to offer a one-stop shop service for European marine and increasingly for biotechnological research projects.

EMPA's mission

EMPA intends to prove that European research projects can be interesting, enjoyable, and produce high-level scientific results.

Environmental & Marine Project Management Agency

Your advantages in cooperating with EMPA are

- tailor-made information on your funding chances enabling fast decision making,
- professionally managed proposal, contract and budget negotiations,
- well-managed relations between research and administration for the whole consortium,
- active and targeted dissemination to diverse stakeholders,
- well-maintained relations with the European Commission during the whole project to increase your chances for further funding.

Let EMPA help you to get European research funding

You have an idea for a project, but you cannot invest the time for strategic positioning and proposal writing?

Contact EMPA for a tailor-made offer, and let us

- develop your strategy for Horizon 2020, including lobby work,
- investigate your best options for getting funded,
- support proposal writing according to your needs.
